EVERY CHILD HAS A RIGHT TO LIVE

Every child’s body and feelings should be valued and treated with kindness

Every child’s body and feelings should be valued and treated with kindness

What is body safety?

1. **Body Safety** is about keeping private parts private and every child’s right to be the boss of their body.

2. Children have a right to **Consent** - that means to say “yes” or “no” to affection and unnecessary touches - like tickles.

3. Children and adults should have **Privacy** when dressing, or using the bathroom.

4. Your **Instinct** is your body’s way of telling you when it feels nervous that a person or situation may not be safe.

5. No one should tell a child to keep a **Secret**. Surprises are okay, like a party, because eventually everyone knows.

6. Your **Safety Circle** is a group of adults who know and support Body Safety.

7. It’s never too late to **Tell** someone in your Safety Circle if you feel someone has broken or may break a body safety rule.

8. Children are **Innocent** and are never to blame if a body safety rule is broken.

Pinwheel Gardens
are planted in April to raise awareness for every child’s right to be safe and loved.
